Hi Madi,

We just had a coordination meeting with the ERM team and I wanted to give you an update on the schedule. The groundwater sampling is tentatively scheduled to begin on Monday, March 8 and is anticipated to take 4 weeks. I'll send you another update next week when the scheduled is firmed up.

Thanks and have a nice weekend!

Hi Madi,

We can definitely provide weekly updates for you and your team. Thanks!

Thank you Eron, that all sounds good. As of now, I don't expect we'll provide oversight of the groundwater sampling event. Would it be possible to get a weekly update about how the groundwater sampling is going, e.g., wells sampled, any technical or H&S issues encountered, deviations, general schedule status?

Thank you,
Madi

Subject: Arkema Project Area - Groundwater Monitoring

Hi Madi,

We talked to the ERM team today and I have some of the details on the groundwater monitoring. The monitoring is

planned to begin on March 1 and will likely last 4 to 5 weeks. The work will start with collection of water levels (probably one day of work) and then the sampling will be done starting with the cleanest wells. ERM is working on the sample order list and I should be able to get that to you tomorrow.

Two of the wells slated for dioxin and furan analysis are located on the GS Roofing property and we are working on an access agreement to sample them. I suspect these wells will be sampled toward the end of the event to allow time to complete the access agreement.

I'll provide more details tomorrow. Please let me know if you have any questions or concerns. Thanks!
